

## Monitrice Client Agreement

A monitrice is like a doula in that she provides labor support and comfort measures. She differs from the doula in that she also is able to assess fetal and maternal well being by checking fetal heart tones, dilation checks, and blood pressure checks. This service is seldom deemed necessary in addition to doula services, but is quite handy in the event that your labor is not progressing in a straight forward manner.

I \_\_\_\_\_ agree/ decline (circle one) monitrice services. I realize that using monitrice services does not take the place of proper medical care during the birth of my child. I understand that information gathered from the monitrice is for my informational purposes only and is not intended to take the place of medical guidance from my doctor or midwife.
